

Monday, 14th June, 2021

Dear Parents/Carers

I am writing to inform you about another exciting event that is happening in school during the week commencing Monday, 5th July. Stanley St. Peter's are holding a whole school Science week.

During this week, children will get the opportunity to revisit the skills and knowledge that they missed in school, as a result of the Spring term lockdown. Teachers are also planning some other exciting activities such as building a bug hotel, making a lava lamp and experiencing a sensory seaside.

As well as the activities above, we would love the children to take part in their own scientific experiments at home. There is a Sixty Second Science booklet provided with a range of activities for you and your child to carry out. Please send any photographs to your child's class teacher via email so that they can be shared with the whole class.

Kind regards,

Miss Thackrah

Assistant Headteacher/ Science Leader
